About Us

In 1983, our establishment commenced operations in Baghdad as an electromechanical contracting and engineering services provider.

Our core focus has been on delivering superior project management and services, emphasizing robust HVAC, MEP, firefighting, power generation, and sewer treatment management practices.

By emphasizing a customer-centric approach, upholding contractual obligations with integrity, striving for continuous optimization of engineering quality, and enhancing service excellence, we have achieved the status of a premier first-class contractor since 2009.

03 Our Team

Our dedicated team is a group of passionate and skilled professionals committed to excellence in every task.

We collaborate closely, leveraging our diverse expertise to achieve common goals. With a focus on innovation, efficiency, and client satisfaction, we work tirelessly to deliver high-quality results and continuously improve in all we do.

05 Our Mission & Values

At Al Raghad Group, our mission is to ensure the seamless and secure operation of projects by continuously elevating professionalism and service quality in construction, MEP contracts & MEP coordination, including composite drawings.

Al Raghad Factory is steadfast in its pursuit of excellence, striving to deliver cutting-edge technology products through meticulous auditing, rigorous quality control, and robust assurance measures. Moreover, we are committed to providing unparalleled after-sales support, including spare parts management, backed by a proficient team specializing in preventive maintenance and repairs.

01. Comprehensive Planning & Efficient Time Management

02. Cutting-Edge Engineering Services

03. Adherence to the Highest Industry Benchmarks

04. Establishment Of Enduring Partnerships with Suppliers & Solution Providers

05. Provision Of Enhanced Commissioning & Services Across All Projects in Our Portfolio

**“Accuracy in
Maintenance
Work”**

06 Our Policy

The Al Raghad's General Construction is committed to ensuring **client satisfaction** through the provision of products and services which always conform to the agreed requirement in respect of specification, **cost and time**.

This is achieved through a **strict compliance** to a **quality assurance system**, which is entrenched and developed for each individual's discipline.

The company is **fully committed** to continually improving **safety performance** and to this end standard safety procedures are implemented and maintained on **every site**.

Before a project commences, Alraghad projects team draws up a **detailed programmed** using **computerized techniques**. Resourcing of a mutually agreed programmed ensures the timeously provision of labor and plant to meet the stipulated requirements.

In pursuit of its aim of maintaining an organization which is **competent, highly motivated and result driven**, Al Raghad Group has made it company policy to recruit, develop and motivate only the best and brightest as its members, people who are able to demonstrate their professional competence, courage and integrity in performing tasks, every day and in every way.

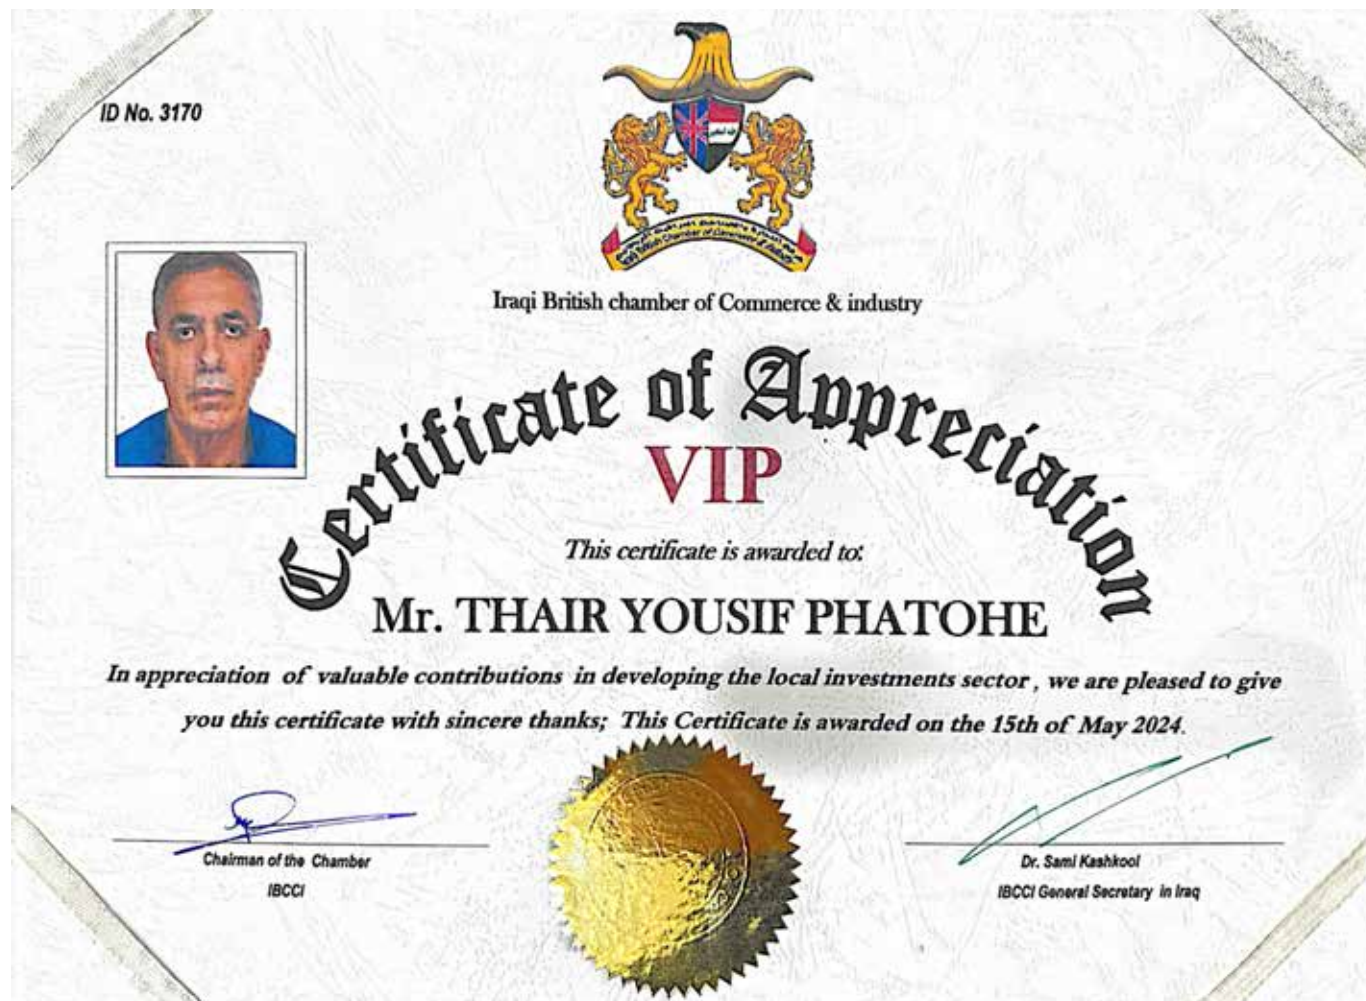

07 Our Vision

Transforming visions into reality, we specialize in delivering exceptional **electromechanical solutions** throughout the Middle East, driven by our unwavering focus on **quality, safety, and client satisfaction**.

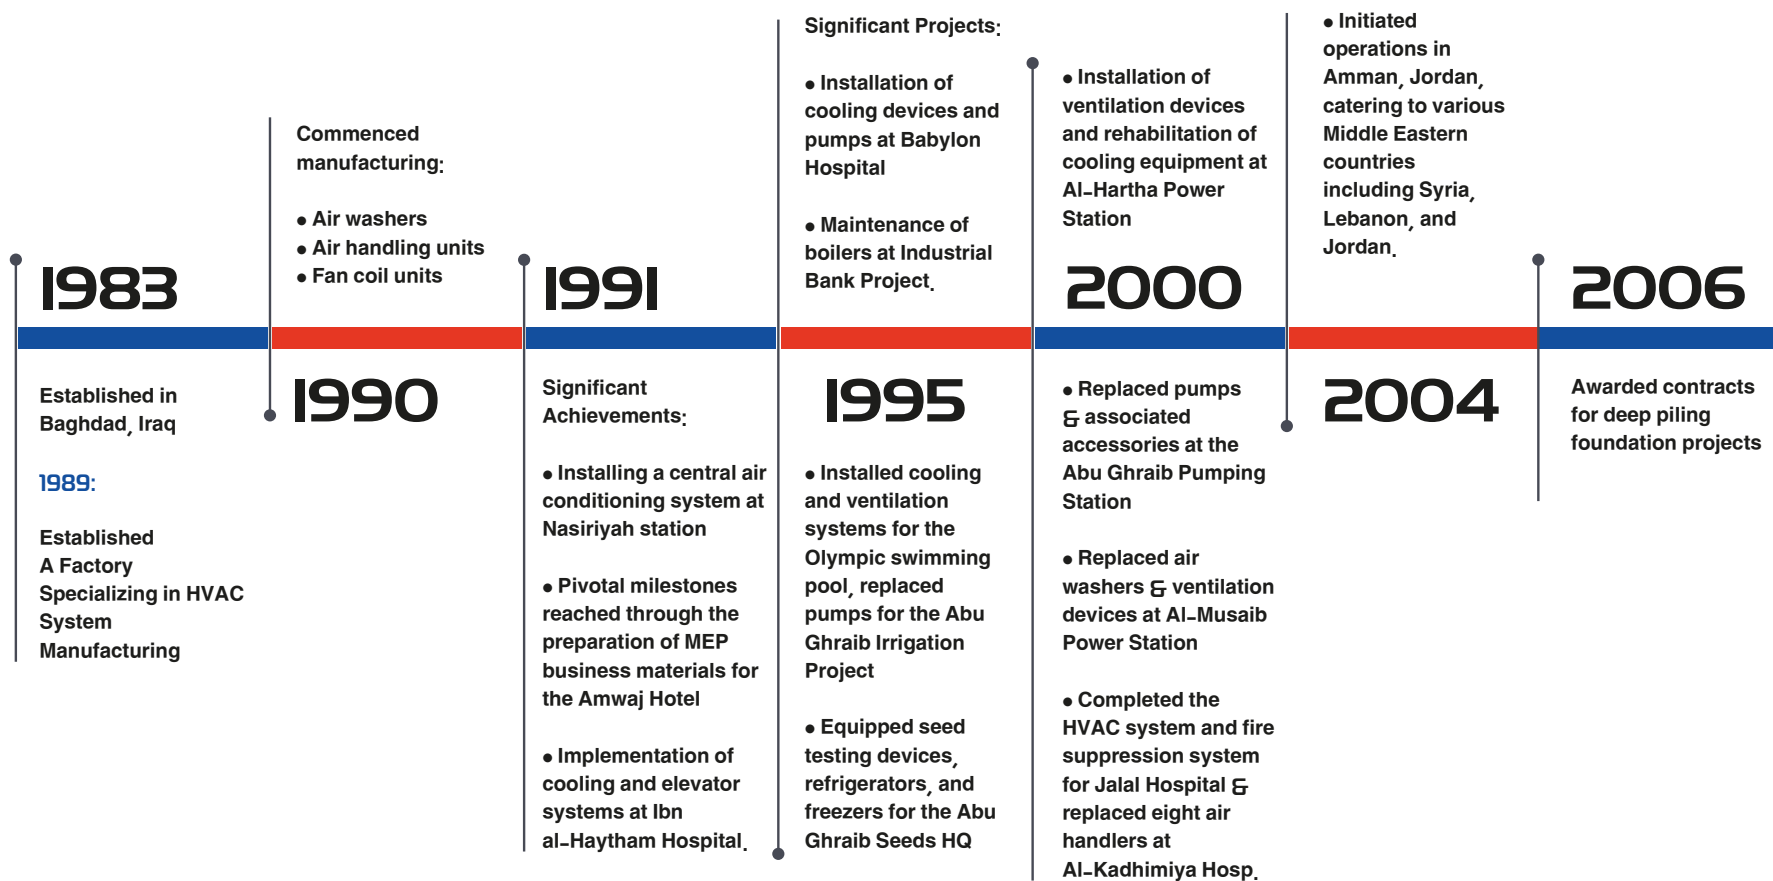

We aim to emerge as a premier and dependable MEP contracting company in the Middle East and globally, consistently delivering unparalleled quality and exceeding client expectations.

HANDOVER

MEP Works:

Over our extensive tenure as an MEP contractor, Al Raghad Group has successfully executed highly complex electromechanical contracts, offering clients comprehensive engineering, procurement, and construction services. These endeavors aim to deliver optimal durability, maintainability, energy efficiency, and reliability results.

Our extensive portfolio of projects encompasses hospitals, airports, hotels, shopping malls, various public buildings, and embassies. Al Raghad Group consistently benchmarks its quality of work against international standards in the construction industry, fostering long-term relationships with key stakeholders in the Iraqi market.

Water Treatment:

Al Raghad International Group has successfully executed a diverse portfolio of water treatment projects. Our expertise encompasses many infrastructure initiatives, including potable water and sewer systems complemented by pump stations.

Additionally, we specialize in the construction and rehabilitation of sewage treatment plants. Our capabilities extend to Reverse Osmosis systems engineering, procurement, and construction.

Electrical Infrastructure:

Our scope of work encompassed the engineering, procurement, and construction of electrical generation units, substations, protection and distribution stations, control systems, street lighting, and various other projects, spanning development initiatives, rehabilitation, and infrastructure expansion.

Throughout our extensive experience, we have successfully implemented specialized systems, including SCADA systems, thermal turbines, power generators, medium voltage step-up and step-down systems, and plant management solutions.

Civil Work:

Encompasses a broad spectrum of construction and infrastructure projects essential for societal development.

It involves planning, designing, constructing, and maintaining various structures such as buildings, bridges, roads, dams, and utilities.
